

Facility Improvement

Vocational Committee

Vocational Committee: Roles and Early Actions

- Alignment with Board of Education Goal #2
- Long-range plans and the costs associated with these plans
- The committee discussed Renovation, Additions and a Free Standing Building
- The committee agreed that we should move forward with investigating the cost associated with a new, stand-alone building on the grounds of GHS

Vocational Committee: Current Vocational Areas

- The current vocational areas at GHS are divided into 3 main areas
 - Automotive Shop, Metals/Welding Shop, Woodworking Shop
- The current combined size of these areas is roughly 4,600 square feet
- Spaces lost by Vocational Department.
- Our current space has several restrictions to it that make it difficult to function properly within

Vocational Committee: Metals/Welding Shop

Vocational Committee: Woodworking Shop

Vocational Committee: Automotive Shop

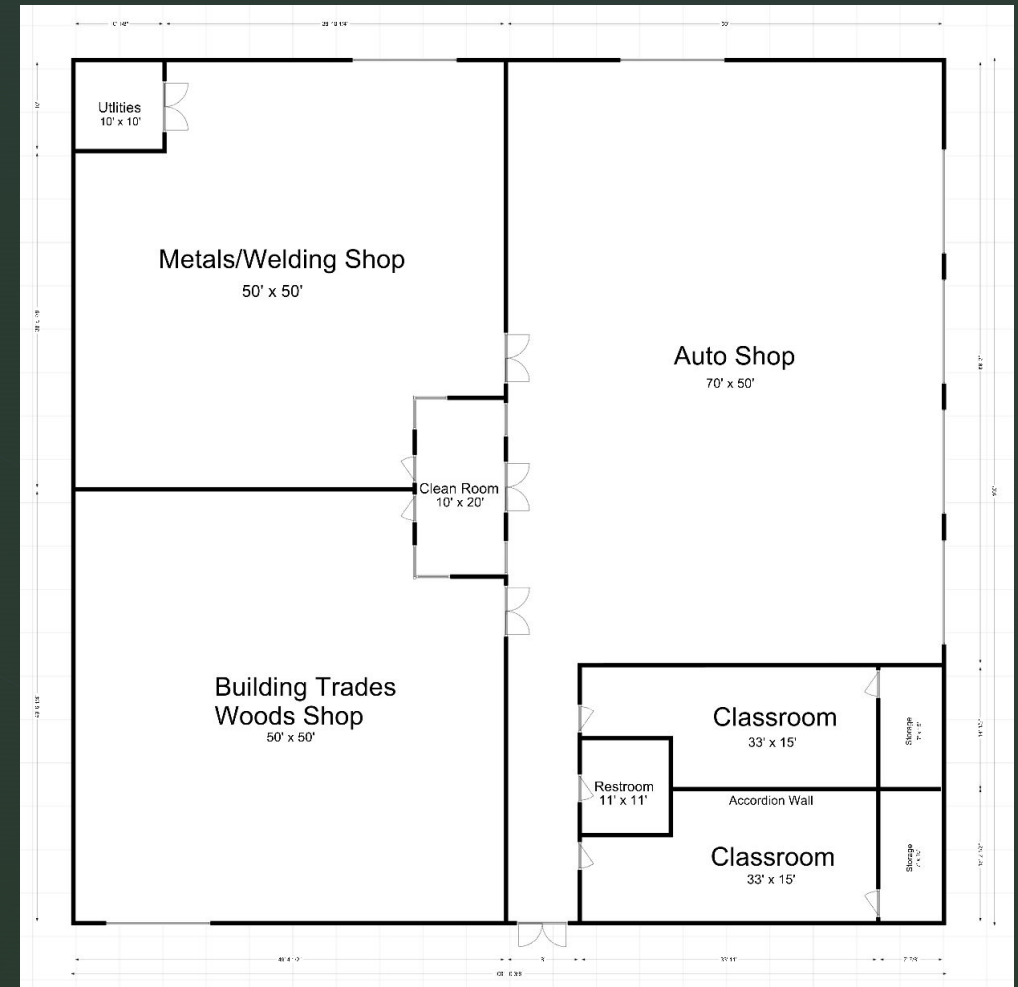

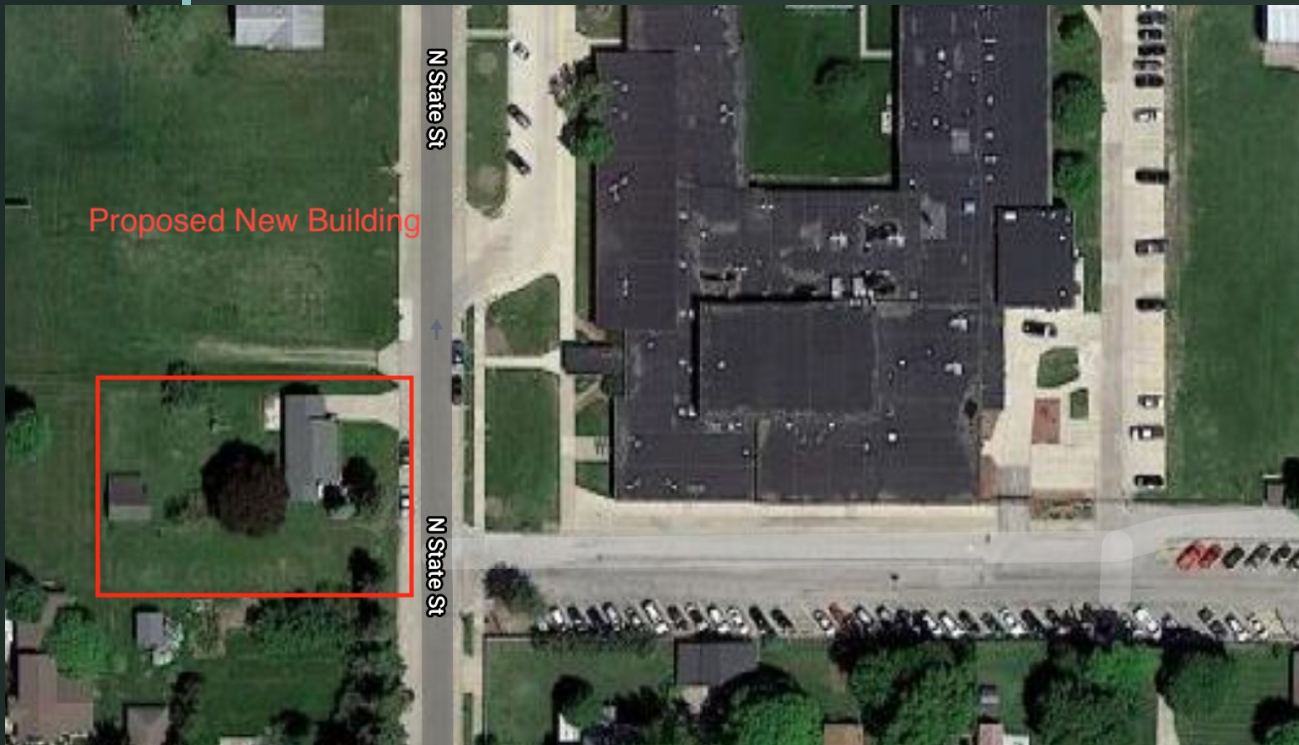

Vocational Committee: Possible New Vocational Building

- A lot is available on GHS Grounds directly across State Street from the new Fine Arts Center.
- The lot is roughly 150'x120'
- This lot would allow for a new 10,000 square foot Vocational Building
- This building would more than double the existing shop space allowing for the expansion of programs
- It would bring the addition of two classrooms for the shops (currently there is no classroom) as well as storages areas both outside and inside the building for materials

Vocational Committee: Possible New Building Location and Layout

This is a preliminary concept drawing of what the new Vocational Building layout would include

Vocational Committee: Funding a New Vocational Building

- Preliminary estimates place the cost of construction a new Vocational Building between \$180 - \$230 per square foot
- The Vocational Committee is pursuing in-kind donations and grants fund the majority of a new Vocational Building
 - Sherrard Foundation Grant
 - Geneseo Foundation
 - Geneseo Education Foundation
 - Denny and Jane Reese Foundation
 - Keppy Foundation
 - Geneseo Communication Foundation
- Possible use of 1% sales tax revenue
- We project that funding of a new Vocational Building will not require the levying of any new taxes
