School Accountability

According to the Illinois General Assembly, the primary purpose of schooling is the transmission of knowledge and culture through which students learn in areas necessary to their continuing development and entry into the world of work. To fulfill that purpose, the Ill. State Board of Education (ISBE) prepared *State Goals for Learning* with accompanying *Illinois Learning Standards*.

The School Board gives priority in the allocation of resources, including funds, time, personnel, and facilities, to fulfilling this purpose.

Quality Assurance

The Board continuously monitors student achievement and the quality of the District's work. The Superintendent shall supervise the following quality assurance components, in accordance with State law and ISBE rules, and continuously keep the Board informed:

- 1. Prepare each school's annual recognition application and quality assurance appraisal, whether internal or external, to assess each school's continuous school improvement.
- 2. Continuously assess the District's and each school's overall performance in terms of both academic success and equity. This includes, without limitation, a thorough analysis of ISBE's balanced accountability measure and each school's *Multiple Measure Index* and corresponding *Annual Measurable Objective* provided by ISBE.
- 3. If applicable, develop District and School Improvement Plans, present them for Board approval, and supervise their implementation.
- 4. Prepare a school report card, present it at a regular Board meeting, and disseminate it as provided in State law.
- 5. In accordance with 105 ILCS 5/2-3.153, annually administer a climate survey on the instructional environment within the school to, at minimum, students in grades 4 through 12 and teachers.

School Year Calendar and Day

School Calendar

The School Board, upon the Superintendent's recommendation and subject to State regulations, annually establishes the dates for opening and closing classes, teacher institutes and in-services, the length and dates of vacations, and the days designated as legal school holidays. The school calendar shall have a minimum of 185 days to ensure 176 days of actual student attendance.

The Board shall approve the calendar that meets the following additional criteria:

a. The Board shall approve the calendars presented by the superintendent following confirmation that he has sought feedback from a representation of stakeholders, to include the GEA, parents, and other members of the school community.

Commemorative Holidays

The teachers and students shall devote a portion of the school day on each commemorative holiday designated in the School Code to study and honor the commemorated person or occasion. The Board may, from time to time, designate a regular school day as a commemorative holiday.

School Day

The Board establishes the length of the school day with the recommendation of the Superintendent and subject to State law requirements. The Superintendent or designee shall ensure that observances required by State law are followed during each day of school attendance.

Student Social and Emotional Development

Social and emotional learning (SEL) is defined as the process through which students enhance their ability to integrate thinking, feeling, and behaving to achieve important life tasks. Students competent in SEL are able to recognize and manage their emotions, establish healthy relationships, set positive goals, meet personal and social needs, and make responsible and ethical decisions.

The Superintendent shall incorporate SEL into the District's curriculum and other educational programs consistent with the District's mission and the goals and benchmarks of the Ill. Learning Standards. The Ill. Learning Standards include three goals for students:

- 1. Develop self-awareness and self-management skills to achieve school and life success.
- 2. Use social-awareness and interpersonal skills to establish and maintain positive relationships.
- 3. Demonstrate decision-making skills and responsible behaviors in personal, school, and community contexts.

The incorporation of SEL objectives into the District's curriculum and other educational programs may include but is not limited to:

- Classroom and school-wide programming to foster a safe, supportive learning environment
 where students feel respected and valued. This may include incorporating scientifically based,
 age-and-culturally appropriate classroom instruction, District-wide, and school-wide
 strategies that teach SEL skills, promote optimal mental health, and prevent risk behaviors for
 all students.
- 2. Staff development and training to promote students' SEL development. This may include providing all personnel with age-appropriate academic and SEL and how to promote it.
- 3. Parent/Guardian and family involvement to promote students' SEL development. This may include providing parents/guardians and families with learning opportunities related to the importance of their children's optimal SEL development and ways to enhance it.
- 4. Community partnerships to promote students' SEL development. This may include establishing partnerships with diverse community agencies and organizations to assure a coordinated approach to addressing children's mental health and SEL development.
- 5. Early identification and intervention to enhance students' school readiness, academic success, and use of good citizenship skills. This may include development of a system and procedures for periodic and universal screening, assessment, and early intervention for students who have significant risk factors for social, emotional, or mental health conditions that impact learning.
- 6. Treatment to prevent or minimize mental health conditions in students. This may include building and strengthening referral and follow-up procedures for providing effective clinical services for students with social, emotional, and mental health conditions that impact learning. This may include student and family support services, school-based behavioral health services, and school-community linked services and supports.
- 7. Assessment and accountability for teaching SEL skills to all students. This may include implementation of a process to assess and report baseline information and ongoing progress

Home and Hospital Instruction

A student who is absent from school, or whose physician, physician assistant, or advanced practice registered nurse anticipates that the student will be absent from school, because of a medical condition may be eligible for instruction in the student's home or hospital. Eligibility shall be determined by State law and the Illinois State Board of Education rules governing (1) the continuum of placement options for students who have been identified for special education services or (2) the home and hospital instruction provisions for students who have not been identified for special education services. Appropriate educational services from qualified staff will begin no later than five school days after receiving a written statement from: (1) a physician licensed to practice medicine in all of its branches, (2) a licensed physician assistant, or (3) a licensed advanced practice registered nurse. Instructional or related services for a student receiving special education services will be determined by the student's individualized education program.

A student who is unable to attend school because of pregnancy will be provided home instruction, correspondence courses, or other courses of instruction (1) before the birth of the child when the student's physician, physician assistant, or advanced practice registered nurse indicates, in writing, that she is medically unable to attend regular classroom instruction, and (2) for up to three months after the child's birth or a miscarriage.

Periodic conferences will be held between appropriate school personnel, parent(s)/guardian(s), and hospital staff to coordinate course work and facilitate a student's return to school.

Instructional Materials

All District classrooms and learning centers should be equipped with an evenly-proportioned, wide assortment of instructional materials, including textbooks, workbooks, audio-visual materials, and electronic materials. These materials should provide quality learning experiences for students and:

- 1. Enrich and support the curriculum;
- 2. Stimulate growth in knowledge, literary appreciation, aesthetic values, and ethical standards;
- 3. Provide background information to enable students to make informed judgments and promote critical reading and thinking;
- 4. Depict in an accurate and unbiased way the cultural diversity and pluralistic nature of American society; and
- 5. Contribute to a sense of the worth of all people regardless of sex, race, religion, nationality, ethnic origin, sexual orientation, disability, or any other differences that may exist.

The Superintendent or designee shall annually provide a list of textbooks and instructional materials used in the District to the School Board. Anyone may inspect any textbook or instructional material.

Teachers are encouraged to use supplemental material only when it will enhance, or otherwise illustrate, the subjects being taught and to ensure it is age-appropriate. No movie rated PG-13 will be shown to children in the Middle School or in any of the District's Elementary schools without parental permission. The Building Principal may make exceptions for those movies that have been edited for view on public television. No R-rated movie shall be shown to students unless prior approval is received from the Superintendent or designee, and no movie rated NC-17 (no one 17 and under admitted) shall be shown under any circumstances.

Instructional Materials Selection and Adoption

The Superintendent shall approve the selection of all textbooks and instructional materials according to the standards described in this policy. The School Code governs the adoption and purchase of textbooks and instructional materials.

6:210 Page 1 of 1

Guidance and Counseling Program

The School District provides a guidance and counseling program for students. The Superintendent or designee shall direct the District's guidance and counseling program. School counseling services, as described by State law, may be performed by a qualified guidance specialist or any certificated staff member.

Each staff member is responsible for effectively guiding students under his/her supervision in order to provide early identification of intellectual, emotional, social, or physical needs, diagnosis of any learning disabilities, and development of educational potential. The District's counselors shall offer counseling to those students who require additional assistance.

The guidance program will assist students to identify career options consistent with their abilities, interests, and personal values. Students shall be encouraged to seek the help of counselors to develop specific curriculum goals that conform to the student's career objectives. High school students will have the opportunity to receive career-oriented information. Representatives from colleges and universities, occupational training institutions and career-oriented recruiters, including the military, may be given access to the school campus in order to provide students and parents/guardians with information.

High School Credit for Proficiency

Proficiency Credits

Subject to the limitations in this policy and State law, the Superintendent or designee is authorized to establish and approve a program for granting credit for proficiency with the goal of allowing a student who would not benefit from a course because the student is proficient in the subject area to receive credit without having to take the course. A student who demonstrates competency under this program will receive course credit for the applicable course and be excused from any requirement to take the course as a graduation prerequisite. No letter grade will be given for purposes of the student's cumulative grade point average. The Superintendent or designee shall notify students of the availability of and requirements for receiving proficiency credit.

Proficiency credit will be offered in the following subject areas:

Foreign language - A student is eligible to receive one year of foreign language credit if the student has graduated from an accredited elementary school and can demonstrate proficiency, according to this District's academic criteria, in a language other than English. A student who demonstrates proficiency in American Sign Language is deemed proficient in a foreign language and will receive one year of foreign language credit. A student who studied a foreign language in an approved ethnic school program is eligible to receive appropriate credit according to the level of proficiency reached; the student may be required to take a proficiency examination.

Other proficiency testing - The program for granting credit for proficiency may allow, as the Superintendent deems appropriate, course credit to be awarded on the basis of a local examination to a student who has achieved the necessary proficiency through independent study or work taken in or through another institution. Proficiency testing may also be used to determine eligible credit for other subjects whenever students enter from non-graded schools, non-recognized or non-accredited schools, or were in a home-schooling program.

Course Credit for High School Diploma

The Superintendent or designee may investigate, coordinate, and implement a program and schedules for students in 7 and 8 to enroll in a course required for a high school diploma.

Students in grades 7 and 8 may enroll in a course required for high school diploma when: (1) the course is offered by the high school that the elementary student would attend, (2) the student participated in the course at the location of the high school, and (3) the student's enrollment in the course would not prevent a high school student from being able to enroll.

Students in grades 7 and 8 may enroll in a course required for a high school diploma where they attend school when: (1) the course is taught by a high school teacher who teaches in a high school of the district where the student will attend high school, and (2) no high school students are enrolled in the course.

A student who successfully completes a course required for a high school diploma while in grades 7 and 8, shall receive academic credit from the Board. That academic credit shall satisfy the requirements of Section 27-22 of The School Code for purposed of receiving a high school diploma, unless evidence about the course's rigor and content show that the course did not address the relevant Illinois learning standard at the level appropriate for the high school grade during the which the course is usually taken. The student's grade in the course shall also be included in the student's High School grade point average in accordance with Board policy.
