The stop motion video club will explore the world of bringing inanimate objects to life through the art of stop motion animation. It will be welcome to beginners and experienced animators alike. Our meetings will be a blend of hands-on workshops, collaborative brainstorming sessions, and movie screenings that showcase both classic and contemporary examples of stop motion animation. Using a variety of common materials such as modeling clay and legos, we will focus on both the technical skills of the craft, as well as the creative aspect of story telling. Finished projects could be showcased in the theater perhaps during a WIN period near the end of the school year.
